

**The best way to support your baby
and your lifestyle**

www.ergobaby.com

Thank you for your purchase of The ERGObaby Backpack.

Instructions for use: The backpack attaches to the back of The ERGObaby Carrier. On either side of the top of the backpack are velcro straps that attach to the backpack around the shoulder straps of the carrier.

When wearing the carrier on the back, first become proficient at loading your baby without the backpack. The backpack is also designed to be used independently of the carrier as a regular backpack with shoulder straps.

The weight limit of the ERGObaby backpack is 8 lbs. If the weight of the back pack is at full capacity, it would reduce the limitation of the weight of the baby carrier to 32 lbs.

Our sincere desire is to offer quality products that help bring parents closer to their children. If for any reason you are not satisfied with the ERGObaby backpack, please contact us. Your satisfaction is guaranteed.
